

Social Security Estimator Now Available Online in Spanish

Our agency has just made our online financial planning tool, the Retirement Estimator, available in Spanish and we are trying to get the word out to the Hispanic community. The Estimator is a great help for people in preparing for retirement. This is also the first time we have made one of our online services available in Spanish. Attached is the press release, in both English & Spanish versions. We're asking if you would consider providing this information to your community, either by posting it on your web site or printing it in your newsletter or bulletin, or just getting the information out in any way you see fit? (I know the releases may be a little long, so it's Ok to reduce them somewhat if you have to.)
